PORTABLE WIRELESS BATTERY-POWERED TURNSTILES

When the Marine Corps in Iraq needed to add military ID (CAC) card reading to a mess facility but also need to have an expandable perimeter in times of high threat... they used Perey Turnstiles wireless portable turnstiles.

When Georgia Tech wanted to add student ID card scanning to their football stadium but also needed the turnstiles to be removable... they use Perey Turnstiles wireless portable turnstiles.

When numerous professional sports organizations have needed to add self-service ticket scanning turnstiles but did not want to tear up their floors to add conduit... they, too, have turned to Perey for wireless portable ticketing scanning turnstiles.

Each of these clients have needed different readers for their ID's or tickets. Each have needed to communicate very differently with a host database system. Each have wanted to go for days or multiple games between recharging. Each have wanted the turnstiles to be self-contained, sleek looking and very easy to use. With all of these differences, what is the one thing they have all had in common...choosing Perey Turnstiles.

PORTABLE WIRELESS BATTERY-POWERED TURNSTILES

WHAT WE PROVIDE

Portable Wireless Battery Powered Turnstiles needing no conduit

- For Rapid Deployment or expansion of ID-Check Perimeter
- For Automated Ticketing

Fixed Wireless Turnstiles requiring only power conduit to minimize conduit requirements.

TYPICAL USERS

Fairs | Ball Parks | Football Stadia | Soccer Stadia
Amusement Parks | Forward Operating Bases
Stock Exchanges | Shipyards | Construction Sites

WHAT DO WE TYPICALLY READ OR SCAN

1D and 2D Bar Codes on ticket stock or print-your-own, Magnetic Stripe, Proximity Cards, MIFARE Cards, biometric scanning including palm, finger and vein scan.

TWO-WAY COMMUNICATIONS INCLUDING

WiFi over 802.11 b/g or 802.15.4, XSC Long Range, Bluetooth, TCP/IP via iPhone and Android, web control via iPhone and Android using DHCP or fixed IP address.

We embed client supplied handheld scanners with built-in wireless communications. These typically communicate with our controls via USB, RS-232, Ethernet, Ethernet with Web Interface or embedded (in turnstile cabinet) Bluetooth. When embedding client scanners we typically provide an external antenna matching the required gain to the exact application.

We employ security protocols including Shared Key, WEP, WPA, and Cisco LEAP with support for WEP, TKIP, and CCMP data encryption.

AVAILABLE FOR THE FOLLOWING MODELS:

Model 140PC, Model 136SS, Model 150SR, Model 150SF, Model 152SR, Model 152SF, Model 048PC, Model 048SS.
